PROFESSIONAL SUMMARY

Passionate Computer Science graduate with experience in building scalable full-stack applications using Next.js, React, TypeScript, Tailwind CSS, Prisma, and MongoDB. Focused on clean architecture, secure development, performance optimization, and polished UI/UX. Strong problem-solver with experience working in agile teams.

WORK EXPERIENCE

Rizzi International
Full-Stack Developer

- Built high-performing features using Next.js, React, Tailwind CSS, API Routes, and animations
- Delivered responsive UI/UX, form handling, API integrations, and SEO improvements
- Contributed to user pages, admin panels, and email automation systems
- Website: rizziinternational.com

Kifgo — Internship
Full-Stack Developer

- Developed and deployed full-stack applications using Next.js, React, TypeScript, Prisma, and MongoDB
- Added new features, optimized performance, and contributed to production systems
- Performed code reviews, debugging, testing, and maintained code quality
- Built secure authentication (RBAC), dashboards, and internal tools
- Website: kifgo.lk

EDUCATION

Eastern University of Sri Lanka, Trincomalee Campus — Trincomalee, Sri Lanka
B.Sc. (Hons) in Computer Science — *2021 – 2024*

PROJECTS

Bookmark — Online Book Selling Platform — Personal Project
Full-Stack Developer

- Developed full-stack e-commerce platform with browsing, filtering, and book management
- Stack: Next.js, Prisma, MongoDB, Tailwind, JWT, Argon2, RHF, Zod, Axios, Context API
- Implemented JWT auth, category filters, search, and admin book creation
- Live: online-book-store | GitHub: repo

Tech-Talk — CRUD Blog Application — Personal Project
Full-Stack Developer

- Created blog platform with CRUD, profile management, and secure access
- Stack: Next.js 15, React 19, Prisma, MongoDB, Tailwind CSS, Zod, React Query, JWT
- Implemented protected routes, profile editing, deletion, search, and pagination
- Enhanced UI with Framer Motion

- Live: crud-blogs | GitHub: repo

ProjeX — Project Management Tool   Personal Project
Full-Stack Developer
- Built collaborative tool for project/task management with progress tracking
- Stack: Next.js, Prisma, MongoDB, Tailwind CSS, JWT
- Implemented workflow (TODO → IN-PROGRESS → DONE) and secure authentication
- Designed scalable API architecture
- Live: projex | GitHub: repo

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, Framer Motion, HTML/CSS

Backend: Prisma ORM, MongoDB, JWT, API Routes, Node.js, Argon2, bcryptjs

Tools: Git, GitHub, VS Code, JIRA, Slack, Hoppscotch, Vercel

Other: UI/UX, Problem Solving, Debugging, Clean Architecture, Responsive Design, Agile

JOB RELATED TRAINING

Full-Stack Web Development   Self-Directed Learning
Online Courses and Projects   *Ongoing*
- Advanced Next.js and React patterns
- Database design and optimization with MongoDB and Prisma
- Authentication, security, and performance optimization
